QUESTION 2 (10 MARKS)

a. Write the External CSS codes for the following button.

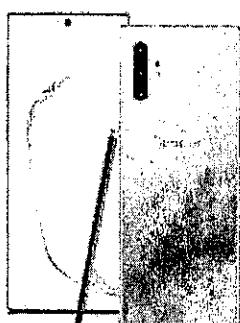

[5 marks]

- The font is a downloaded font file *starlight.otf*. Use this font as a new font with the name *myFont*.
- The button:
 - The width is 130px and the height is 40px.
 - The borders are 2px thick single lines and the colour is black.
 - There is a background image called *feedback.png* and it is located 5px from the left and the right. The text is indented by 35px.
 - The corners are rounded by 10px.
- The button when mouseover:
 - The background colour changes to #eead0e with a transparency of 50%. The text colour is white.
- The button when it is clicked:
 - The background colour changes to red and the transparency is 0%.

b. Write only the Internal CSS codes for the given design and guidelines.

[5 marks]

Unbeatable Specs

- ✓ 8GB of RAM and 256GB storage
- ✓ 6.3-inch Display
- ✓ Triple Rear Camera
- ✓ Reverse wireless charging

```
<div id="wrapper">
<div id="image-box">
    
</div>
    <div id="features-box">
        <p>Unbeatable Specs</p>
        <ul>
            <li>8GB of RAM and 256GB storage</li>
            <li>6.3-inch Display</li>
            <li>Triple Rear Camera</li>
            <li>Reverse wireless charging</li>
        </ul></div>
</div>
```

Continued...

Guidelines:

- The wrapper:
 - The width is 600px with a #ffffdd background colour. The space between the border and the content is 5px.
- The image-box:
 - The width is 290px. The image size is 300 x 300 pixels.
 - The features box:
 - The width is 290px. The paragraph in this section is bold and underlined. The font size is 15pt.
 - The list in this section is red and uses the bullet image *check.png*. The font size is 12pt.

QUESTION 3 (10 MARKS)

a. Given the following HTML codes, write only the JavaScript codes to get the display of the following output. [10 marks]

```
<form name="frm1">
<p>Flowers you wish to order:
<select name="flowerType">
<option value="Rose">Bouquet of 12 long-stemmed Roses (RM120)</option>
<option value="MixedRose">Mixed Flowers bouquet including
roses (RM100)</option>
<option value="Mixed">Mixed Flowers bouquet (RM90)</option>
</select>
<p>Choose a Payment Method :
<input type="radio" name="payment_method" value="Cheque" > Cheque
<input type="radio" name="payment_method" value="Cash" checked> Cash
</p>
<p> Delivery or Pickup? : <select name="DelStatus">
<option value="Delivery" selected>Delivery</option>
<option value="Pickup">Pickup</option>
</select>
</p><p><input type="button" name="btn" value="Submit Order"
onclick="Order(); " />
</p>
</form>
```

- When the *Submit Order* button is clicked, the *order()* function will be called.
- In function *order()*:
 - Declare all the necessary variables.
 - All the information will be retrieved from form *frm1*.
 - Use switch case to determine the price for each type of flower.
 - If customer choose delivery, RM5 will be charged for the delivery service.
 - Calculate the total price.
 - Display the order details using alert box as shown at the following sample output display.

QUESTION 4 (10 MARKS)

This PHP and MySQL program lists the subjects from the database for subject registration process. Students could view the subject list and register for the subject.

Table 1 subject

subject_id (PK)	subject_code	subject_name
1	DCS5288	Internet and Web Publishing
2	DCT5038	Data Communication and Networking
3	DIM5058	Mathematical Techniques 1

Table 2 registration

reg_id (PK)	register_date	register_student_id	register_subject_id
1	11 April 2019	100104	1
2	11 April 2019	100104	2
3	20 April 2019	100105	1

a. Given the following details, write the connection to the database. [1 mark]

```
$host = "localhost";
$user = "root";
$password = "";
$database = "mmudb";
```

Write a complete PHP and necessary HTML codes for *register.php* which display the subject list from the database for the registration purposes. Sample outputs is shown as below. [5 marks]

The screenshot shows a simple HTML form. At the top, there is a list of subjects with their respective codes and names. Below the list is a single button labeled "REGISTER SUBJECT".

DCS5288--Internet and Web Publishing
DCT5038--Data Communication and Networking
DIM5058--Mathematical Techniques 1

REGISTER SUBJECT

b. Once the student click the *register subject* button, the data will be inserted in the database. Write the PHP and SQL codes to insert the data into the *registration* table. [4 marks]

End of Page.
